

CHINMAY RAJ

chinmayraj976@gmail.com | 8073612816 | [LinkedIn](#) | [GitHub](#)

PROFESSIONAL SUMMARY

Information Science undergraduate specializing in AI/ML and full-stack development, with hands-on experience building an NLP-based agricultural chatbot and a production-style airline booking system. Skilled in Python, Java, and SQL, with a track record of measurably improving model accuracy and system performance. Seeking a Software Engineer / ML Engineer role where I can apply strong CS fundamentals to ship scalable, data-driven products.

EDUCATION

Malnad College of Engineering, Hassan

2022 – 2026

Bachelor of Engineering, Information Science and Engineering | CGPA: 8.65 / 10

Relevant Coursework: Operating Systems, Data Structures & Algorithms, Artificial Intelligence, Computer Architecture, Machine Learning, Cloud Computing Architecture, Database Management Systems, Object-Oriented Programming

Vivekananda Pre-University College, Puttur, Dakshina Kannada

2020-2022

Pre-University (PCMB) | 91.3%

Pushpa English Medium School, Periyapatna

2019-2020

Class 10 | 89.44%

TECHNICAL SKILLS

Languages: C, Python, Java, SQL

Databases: MySQL, SQLite

AI / ML: NLP, Machine Learning, Scikit-learn, Jupyter, Anaconda

Web & Frameworks: HTML, CSS, JavaScript, Streamlit

Tools: Git/GitHub, VS Code, Eclipse, PyCharm, Selenium, Figma

EXPERIENCE

Data Science Intern — Princeton Smart Engineers

2026

- Built a machine learning-based Second-Hand Car Price Evaluation System in Python, covering data cleaning, feature engineering, model training, and evaluation.
- Tuned preprocessing and model parameters to improve prediction accuracy and reduce inference time, contributing directly to system reliability.

PROJECTS

FarmGPT — NLP Chatbot for Agriculture

2025

- Designed an NLP-driven chatbot that gives farmers real-time guidance on crop yield prediction, disease detection, and fertilizer recommendations.
- Improved prediction accuracy over baseline models through feature selection and hyperparameter tuning, translating to more reliable field guidance.

Airline Management System — Java, OOP, SQL

2024

- Built a full-stack airline booking and management system in Java using OOP principles, backed by a relational SQL database.
- Implemented flight scheduling, real-time seat availability tracking, and automated cancellation workflows.
- Optimized SQL indexing and query structure, measurably reducing query response time under load.

ElectraPoint — EV Charging Station Locator

2024

- Developed a responsive web app (HTML, CSS, JavaScript) integrated with GPS APIs to locate the nearest EV charging stations.
- Optimized geolocation query logic to cut search latency, directly improving usability for EV drivers.

NPTEL CERTIFICATIONS

- Human Computer Interaction — NPTEL, April-2025
- Public Speaking — NPTEL, October-2025
- Soft Skill Development — NPTEL, March-2025

ACHIEVEMENTS & LEADERSHIP

- Secured 4th place in a state-level hackathon organized by Kalpatharu Institute of Technology, Tiptur.
- Consistently placed in top positions across multiple college and inter-college coding competitions.
- Technical Events Coordinator: organized 2 coding workshops for 60+ students, boosting peer technical engagement.
- Recognized by Mysore District Science Association for best science model at a regional Science Fair.
