PROFESSIONAL SUMMARY

Software engineering undergraduate with a strong foundation in Operating systems, Algorithms, data structures, and system design. Experienced in building scalable applications and AI-driven solutions, with projects spanning NLP, databases, and web development. Passionate about solving complex problems and contributing to innovative products at scale

TECHNICAL SKILLS

- **Languages:** C, Python, Java, SQL
- **Databases:** MySQL, SQLite
- **AI/ML:** NLP, Machine Learning, Anaconda, Jupyter
- **Web/Frameworks:** HTML, CSS, JavaScript, Streamlit
- **Tools:** Eclipse, VS Code, Selenium, PyCharm, Figma, GitHub/Version Control

EXPERIENCE

- **Data Science Intern at Prinston Smart Engineers** **2026**
 - Developed a machine learning-based Second-Hand Car Price Evaluation System using Python and data analysis techniques
 - Performed data preprocessing, model training, and evaluation to improve prediction accuracy and system performance

PROJECTS

- **FarmGPT (NLP + AI for Agriculture)** **2025**
 - Developed an AI-driven Natural Language Processing (NLP) chatbot to optimize agricultural practices
 - The outcome provides farmers with real-time assistance by predicting crop yields, detecting diseases, and recommending optimal fertilizer usage
 - Improved prediction accuracy by 20% over established baseline models, directly enhancing the quality of guidance
- **Airline Management System (SQL + OOP)** **2024**
 - Engineered and deployed a full-stack airline booking and management system utilizing Java and Object-Oriented Programming (OOP) principles with a robust SQL database backend
 - Managed efficient flight scheduling, real-time seat availability tracking, and automated cancellations
 - Enhanced database query performance by 30% through implementing optimized SQL indexing and query tuning
- **ElectraPoint (EV Charging Locator)** **2024**
 - Built a responsive web application (HTML, CSS, JS) integrated with GPS APIs to locate nearest EV charging stations
 - Enhanced performance by optimizing geolocation queries, resulting in 40% reduction in search latency
 - Directly improved user convenience and accessibility to essential EV infrastructure

ACHIEVEMENTS

- Secured 4th place in State-level hackathon organized by Kalpatharu institute of Technology, Tiptur
- Consistently secured top positions in multiple college and external coding competitions
- Technical Events Coordinator: Coordinated technical events, including organizing 2 coding workshops for over 60 students, significantly boosting technical engagement
- Academic Honor: Recognized by the Director of Vivekananda College for achieving a perfect score (100) in 12th grade Mathematics
- Recognized by Mysore District Science Association for exhibiting best science model for Science Fair in High School

EDUCATION

Bachelor of Engineering | Information Science and Engineering | Malnad college of Engineering, Hassan | Grade: 8.33 |
Coursework | Operating Systems, Data Structures and Algorithms, Artificial Intelligence, Computer Architecture, Machine Learning, Cloud Computing architecture, Database management system, Object-Oriented Programming |
Pre University | Vivekananda Pre-university college, Puttur, Dakshina Kannada | Grade: 91.3 |
Class 10 | Pushpa English Medium School, Periyapatna | Grade: 89.44 |
